You can choose what's best for your company!

JEONSOFT WEB HRCM

is a recruitment platform designed to source candidates through job postings, schedule interviews, and manage the necessary paperwork for hiring and training. It also includes performance evaluations, which assess employee progress and effectiveness, and a learning management system that facilitates training, skill development, and continuous learning within the organization.

WORK FROM HOME AUDITOR *(Track | Capture | Generate)*

- ✓ It allows authorized users (such as the management, HR or supervisor) to **monitor employee activities remotely**: anytime, anywhere.
- ✓ It includes **screen-capture feature** which automatically takes an image of employee's screen based on configured schedule or frequency.
- ✓ **Employee Status** can be categorized as **Online**, **Offline** or **Idle** (*if no activity has been recorded by the system for a specified time*) so users can easily track employee availability and activity.
- ✓ Tracks **browser activities** and **running application**

Recruitment and Employee Monitoring

Hiring and Monitoring of employees made easy!

PAYROLL OUTSOURCING

Using our solution, we process end-to-end timekeeping and payroll, up to generating of necessary reports.

Upcoming Products and Services

Jeonsoft continuously improves and provide products and services that solves problems!

Philippine Government Compliance

Our solution supports all Philippine Government requirements of these agencies.

Project Timeline

Based on our initial assessment, below will be our timeline: **24 days**

Activity / Milestone	Duration
Project Kick-off: <i>project scope, statement of work, costs, project management team and project timeline are discussed and clarified to promote a well-organized and effective project implementation plan.</i>	1 day
Business Requirement Documentation: <i>gathering and documenting the client's policies, salary computations, schedules and other setup related to the project.</i>	1 day
Software Installation: <i>installation of the system and/or setting up the client's login credentials to access the system.</i>	4 days
Data Migration and System Setup: <i>involves two activities as indicated below:</i> <i>1. Migrating the client's Relevant Data to the system. For purposes of this section, Relevant Data shall mean employees 201 data, timekeeping records and other related information which are needed to perform Test Run and proceed with Go-Live.</i> <i>2. Configuring the system to match client's requirements as indicated in Business Requirement Document ("BRD")</i>	6 days
User Training: <i>training system users on different modules, functions and features of the system. In all cases, training shall be on a train-the-trainer basis.</i>	4 days
Test Run: <i>involves conducting payroll test run for two (2) previous payroll periods using the system to evaluate whether the system produces output that are consistent with client's requirements as identified in BRD.</i>	5 days
Go-live: <i>milestone in which the system's timekeeping or payroll module is used to process time-attendance or payroll entries for one (1) payroll period for and by the client or any of its subsidiary(ies).</i>	2 days
Project Completion: <i>signifies that all deliverables under Software Agreement ("Agreement") are implemented and delivered in accordance with terms of Agreement.</i>	1 day

A low-angle photograph of a modern glass skyscraper, likely a financial or corporate building, reaching towards a clear sky. The building's facade is composed of numerous glass panels and structural elements, creating a complex geometric pattern. A large, semi-transparent blue circle is superimposed over the center of the image, partially obscuring the building. Inside this circle, the words "Thank you" are written in a bold, white, sans-serif font. The overall composition is clean and professional, with a focus on architectural detail and a clear message.

Thank you
